

Express Cylinder Service

Breakdown? → Need a **fast** response?

Your pneumatic cylinder next day guaranteed*

Next day
delivery
if you order
before 1pm!

Standard format pneumatic cylinders
offered with the following features:

- Standard
- Bore - 32- 125mm
- Stroke lengths up to 2800mm
- Anodised end-plates and tubes
- Stainless steel piston rod
- Pneumatic cushioning
- Rod seals
- Magnetically coupled
- Integrated sensor grooves

Express cylinders are manufactured, assembled and tested by our certified Distributor Partners using the same high quality components as used in our Parker supplied P1D-S cylinders. Provide the required cylinder bore size and stroke length to your local Parker Distributor for your order to be processed.

* Conditions

Delivery is subject to stock availability and refers to small quantity requests. With larger quantities delivery will be advised upon receipt of order. Parker reserves the right to change any of these document details without prior notice. Any warranty claim associated with locally stroked cylinders are to be advised and are the responsibility of our Local Stroking Distributor Partner
